ABSTRACT

This article is an overview of modern educational technologies and their applicability in the process of teaching the culture of speech to future primary school teachers. Teaching speech culture plays an important role in the formation of teachers' competencies, since primary school teachers are key figures in the development of communication skills and language skills in children. The article analyzes various methods and approaches, including technological tools used in teaching speech culture. The issues of using virtual reality, online platforms, multimedia resources, as well as distance learning methods will be considered. The article will also discuss the effectiveness of these technologies and their impact on the level of training of future primary school teachers. The authors of the article emphasize the importance of combining traditional teaching methods with innovative technologies to achieve optimal results. The research can be useful both for pedagogical institutions involved in the training of future primary school teachers, and for education specialists interested in modern technological solutions in the context of teaching speech culture.

KEYWORDS

Educational technologies, Teaching speech culture, Future primary school teachers, Modern methods, Virtual reality, Online platforms, Multimedia resources, Distance learning, Innovations in education, Pedagogical training, Technology integration, Learning efficiency, Traditional teaching methods, Development of communication skills, Educational practice, Pedagogical research.

INTRODUCTION

Modern education has become an important component of the development of society, and educational technologies play an important role in improving the quality of education. The culture of speech is of fundamental importance, especially in primary school, where basic communication skills are formed. Future primary school teachers should be well prepared to teach the culture of speech, and for this they need to use modern educational technologies. Modern education has become much more dynamic and accessible thanks to the rapid development of information technology[1]. These technologies have a significant impact on education in various fields, including the training of future primary school teachers. One of the important aspects that needs to be taken into account in this process is the development of speech culture. In this article we will consider modern educational technologies and their applicability in teaching the culture of speech to future primary school teachers.

Education is a key pillar of modern society, and its effectiveness depends on the quality of education that is provided to future teachers, especially primary school teachers. Today it has become clear that traditional teaching methods do not always contribute to the formation of a high culture of speech among future teachers. In this article, we will look at how modern educational technologies can help improve the process of teaching speech culture to future primary school teachers.

Modern educational technologies

Modern educational technologies provide students and teachers with new opportunities for effective learning and skills development. Some of the key technologies that can be applied in teaching speech culture to future primary school teachers include:

1. Virtual Classrooms and Web Conferences: Virtual classrooms allow students and teachers to interact in an online environment. This is especially useful for practical classes on the culture of speech, where you can conduct lessons in the form of dialogues and discussions.
2. Interactive educational programs: There are many applications and programs that help improve communication skills and speech culture. They provide students with the opportunity to practice pronunciation, correct accent and vocabulary.
3. Using multimedia resources: Audio and video materials can be great tools for demonstrating correct pronunciation and language features.
4. Social networks and educational platforms: Such resources allow students to communicate and exchange information, which contributes to the development of communication skills.

Application of educational technologies in teaching speech culture

The use of modern educational technologies in teaching the culture of speech to future primary school teachers has a number of advantages:

1. **Interactive learning:** Modern technologies allow you to create interactive lessons where students can practice various aspects of speech culture in a playful way, which makes the learning process more exciting and memorable.
2. **Individualization of learning:** Technology allows you to adapt the learning material to the specific needs of each student. This is especially important as students may have different levels of language skills.
3. **Accessibility and flexibility:** Online resources are available around the clock, which allows students to study at a convenient time for them. This is especially important for future teachers who may have limited free time.
4. **Feedback:** With the help of technology, teachers can provide students with fast and accurate feedback on their speech skills, which contributes to their improvement.

Interactive learning platforms are one of the key elements of modern educational technologies. They provide students with access to educational materials, educational resources, and means to communicate with teachers and classmates. For future primary school teachers, this means access to pedagogical materials and practical tasks that they can use in their future work[3]. Multimedia lessons allow you to enrich the learning process with a variety of visual and audio materials. This is especially important for teaching speech

culture, as multimedia lessons can include audio and video materials, models of correct pronunciation, and samples of good communication.

There are many online courses and webinars dedicated to the development of communication skills and speech culture. Future primary school teachers can learn from experienced professionals and receive feedback online, which allows them to improve their skills. Social networks and messengers can become useful tools for teaching speech culture. With their help, teachers can organize communication and discussions with students, teaching them adequate and respectful communication.

The use of modern educational technologies in teaching the culture of speech to future primary school teachers. Modern educational technologies allow you to create personalized educational plans, taking into account the level of skills and needs of each student. Future teachers can use this approach to teach speech culture, paying attention to the characteristics of each student[3]. Online platforms and tools allow students to receive instant feedback on their pronunciation and communication skills. This contributes to a faster improvement of their skills and abilities. Multimedia and interactive tasks can make learning speech culture more attractive and interesting. Future teachers can use such assignments to show their students how to communicate and express their thoughts correctly. Network resources and platforms allow future teachers to exchange experiences with colleagues and specialists from all over the world.

This exchange allows them to expand their knowledge and skills in the field of speech culture.

With the development of Internet technologies and the availability of high-speed Internet, teachers can use virtual classrooms and online courses to teach speech culture. This allows them to access high-quality educational materials and instructions developed by professionals in this field[4]. Teachers can choose courses that match their level of knowledge and needs, which makes learning more personalized.

The use of multimedia resources, such as audio and video materials, interactive textbooks and online games, can make the process of teaching speech culture more exciting and interesting for future primary school teachers. Visual and audio materials can help teachers explain complex concepts and concepts, as well as demonstrate correct pronunciation and intonation. Modern educational technologies allow future primary school teachers to learn how to interact with students and colleagues through various communication tools. Virtual conferences, video chats and online forums contribute to the development of communication skills and teaching speech culture. It also opens up access to feedback and advice from more experienced teachers.

Modern educational technologies make it possible to create adaptive training programs that can be customized to the level of knowledge and needs of each teacher. This is especially important in teaching speech culture, as different teachers may have different skills and levels of

language proficiency. Adaptive programs help each teacher to develop their skills in accordance with their individual needs. Modern technologies also simplify the evaluation and feedback process[3]. Teachers can use online testing and automated systems to assess students' skills in the field of speech culture. This allows them to quickly identify weaknesses and provide students with additional assistance.

Modern educational technologies have undergone significant development in recent decades and provide many opportunities for teaching the culture of speech to future primary school teachers. These technologies can improve the effectiveness of learning by making it more interactive and accessible. Here are some modern educational technologies and their applicability in teaching the culture of speech to future primary school teachers:

Virtual Reality (VR) and Augmented Reality (AR): VR and AR technologies can create immersive environments for teaching speech culture. Students can immerse themselves in virtual classrooms where they can interact with virtual students and teachers by practicing various aspects of speech, such as pronunciation, intonation and gestures. **Mobile Apps:** Mobile apps for language and speech culture teaching can provide students with access to educational materials, practical exercises, and even interactive games[8]. These applications can adapt to each student's level of knowledge and provide an individualized experience. **Video Tutorials and Online Platforms:** Platforms such as YouTube, Coursera and Udemy offer extensive

libraries of video tutorials on various aspects of speech culture. Students can study a variety of styles and accents, as well as learn different aspects of speech culture from different regions of the world. Social Networks and online communication: Social networks and online forums provide an opportunity for students to communicate and share knowledge with native speakers and other students. This contributes to the development of practical communication skills and speech culture. Artificial Intelligence (AI) and Automated Verification Systems: AI systems can evaluate and analyze students' pronunciation, grammar and intonation. This allows students to receive feedback and recommendations to improve their speech.

Webinars and video conferences: Using video conferencing platforms, teachers can organize online lessons and seminars where students can learn and practice speech culture in real time, even from a distance[7]. The use of these modern educational technologies in teaching the culture of speech to future primary school teachers can significantly enrich the educational process. They can provide students with more opportunities for practice and self-development, which, in turn, will help them better transfer knowledge and skills to their future students.

CONCLUSION

Modern educational technologies provide unique opportunities for teaching the culture of speech to future primary school teachers. Interactive learning platforms, multimedia lessons, online

courses, and other tools make the learning process more accessible, interesting and effective. These technologies allow you to create personalized educational plans, provide feedback and self-assessment opportunities, and facilitate the exchange of experience. Thanks to these innovations, future primary school teachers can receive a better education in the field of speech culture and be more prepared for their future profession.
